

100% Pure & Natural Lavender Water (Hydrosol)

What is Hydrosol?

Lavender Water (Hydrosol) is a byproduct of the essential oil steam distillation process. The essential oil is separated out, like cream rising to the top of an old milk bottle. The remainder is a nice-smelling, multi-purpose water with all the properties of the plant(s) it has been extracted from. We neither add-to nor dilute the hydrosol.

All natural. No additives. No preservatives. Cruelty-free.
Made from lavender that is grown and harvested in Central Oregon.
Steam-distilled in Tumalo, Oregon.

Uses & Benefits

- ◆ **Moisturize and refresh skin and hair.**
Gentle, natural facial toner and calming aftershave that revitalizes skin, restores natural pH-balance, and fights acne.
- ◆ **Relieves stress and can help to encourage sleep.**
Mist your room, body, face and pillow.
- ◆ **Natural home cleaning.**
Use to freshen linens and upholstery, clean and disinfect countertops.
- ◆ **Calm and soothe skin.**
Kill germs and promote healing of minor wounds, ease itching, and stop bleeding of minor cuts.
